Event Server - Hardware Minimum Requisites

Architecture: x86

CPU: Two 64-bit CPUs or one 64-bit dual-core processor.

Processor: 2.0GHz or faster Intel 64 or AMD 64 processor.

Memory: 4GB RAM. Memory requirements might be higher if distributed queries processing is done at server

Disk Storage: 64 GB (Including OS). Disk requirements might be higher if Event Server is setup for automatic non-incremental backups on the same machine.

Network: Gigabit connection recommended.
